<b>Office Action Summary</b>	<b>Application No.</b> 10/526,688	<b>Applicant(s)</b> KOHMURA ET AL.	
	<b>Examiner</b> Margaret G. Moore	<b>Art Unit</b> 1796	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 22 August 2008.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

Art Unit: 1796

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/22/08 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1, 3, 6 to 8, 15, 18 and 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Weidman et al.

Weidman et al. teach a method of forming a dual damascene structure. Please see the structure/diagram shown below the abstract which includes a layer 116 and, directly on top of 116, a layer 122. The bottom of column 7 teaches that the layer 116 is a mesoporous silica film, meeting the claimed porous film mainly having Si-O bonds as well as claim 3. Column 8, line 35, teaches depositing on this porous film a layer formed from tetramethylcyclotetrasiloxane, which is a cyclic siloxane having Si-O-Si backbone and Si-H groups. This corresponds to the organic silicon compound in claim 1. The bottom of column 10 through the top of column 11 teaches that the layer 122 is formed by the treatment of porous silica with TMCTS in a He gas at a temperature of 350°C. This anticipates the "conducting a thermal treatment" step in claim 1. In this manner the instant claims are anticipated. Column 1 makes reference to semiconductors, anticipating claim 8.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weidman et al.

While Weidman et al. do not specifically teach a pore size, the Examiner notes that "mesoporous" is taken to mean a pore size between 2 and 50 nm. From this one having ordinary skill in the art would have found a pore diameter within the claimed range to have been obvious and well within routine experimentation of the teachings of Weidman et al.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Margaret G. Moore whose telephone number is 571-272-1090. The examiner can normally be reached on Monday and Wednesday to Friday, 10am to 4pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
